

# Case Study: AECOM (Ireland)

## Challenges:

AECOM, a global infrastructure consulting firm, leverages its worldwide expertise to address local challenges in Ireland, including biodiversity loss, climate change, energy security, and the transition to net zero. These critical issues align with both national priorities and AECOM's mission to deliver sustainable solutions.

In Ireland, our work focuses on protecting natural resources and supporting clients to achieve their sustainability goals. For example, we collaborate with Uisce Éireann to provide clean drinking water, safeguard aquatic ecosystems, and improve wastewater management. Additionally, as one of Ireland's leading ground remediation specialists, we play a significant role in restoring land and mitigating environmental risks.

By integrating global technical excellence with local knowledge, we ensure that our programmatic approach addresses Ireland's unique environmental and regulatory challenges throughout the entire project lifecycle.

## Impact:

Since joining the Supply Chain Sustainability School in early 2024, AECOM Ireland has actively engaged employees in developing their sustainability expertise. Approximately 60 employees have registered with the School, dedicating an average of one hour each to exploring resources and collectively achieving nearly 19 hours of certified Continuous Professional Development (CPD).

This engagement has enhanced our employees' understanding of key sustainability topics, enabling them to implement best practices and support clients more effectively. Membership also allows us to showcase our strong commitment to sustainability, bolstering client trust and collaboration on shared environmental goals.

## Value gained:

AECOM's participation in the Supply Chain Sustainability School supports our global **Think and Act Globally** roadmap by advancing key priorities in Ireland. It fosters continuous professional development, equipping employees with the latest sustainability knowledge to transform how we work and deliver innovative solutions. Shared membership with clients strengthens collaboration, aligning sustainability goals and building trust. Additionally, our involvement reinforces AECOM's leadership in Environmental, Social, and Governance (ESG) initiatives, demonstrating our commitment to driving sustainable progress. By integrating global
